Money mindset is largely influenced by past experiences around money. It's entirely possible that you learned financial beliefs from your parents or grandparents that are shaping your decisions and actions influencing your outcome.

The good news is that, regardless of your background, your money mindset can be strengthened and/or changed depending on the information you consume today. You can develop new attitudes -- and reforming old ones -- by adopting a more positive outlook and taking control of the factors in your financial life.

By the end of this presentation, participants will learn:

- 1. Characteristics of growth vs. stuck mindset.*
- 2. How to shift your mindset about money mindsets.*
- 3. Setting a clear financial plan that works.*

This enlightening presentation is part 1 of a 2-part series to help interior design professionals build a solid and sustainable Million Dollar Design practice. There will be a Q&A session for attendee participation at the end of this presentation.
